MY_TEMP °F °C
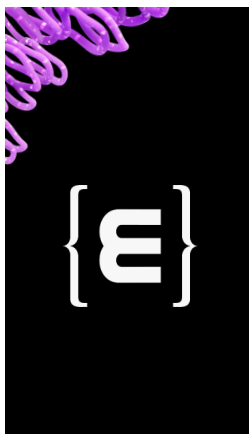

Fahrenheit or Celsius ?

Preliminaries :

BINARY NAME : TEMP

LANGUAGE : C

COMPILATION : MAKEFILE

Project :

ME AND MY FRIEND GET ALONG VERY WELL BUT WE DO NOT MESURE TEMPERATURE THE SAME. WE NEED A TOOL TO CONVERT IT FAST !

- YOU HAVE TO ASK USER FOR HIS TEMP UNIT AND THEN CONVERT IT.
- THE USE OF '&&' IS NOT ALLOWED
- HINT : MAN TOUPPER
- NO INTERNET ALLOWED

Example :

```
→ corrections git:(main) ✗ ./temp
What is the unit ? 'C' for Celsius and 'F' for Fahrenheit : c
The temperature is currently in Celsius.
Enter the temperature : 50
The temperature is 122.00 Fahrenheit.
→ corrections git:(main) ✗ ./temp
What is the unit ? 'C' for Celsius and 'F' for Fahrenheit : hello
The temperature unit is wrong.
→ corrections git:(main) ✗ ./temp
What is the unit ? 'C' for Celsius and 'F' for Fahrenheit : F
The temperature is currently in Fahrenheit.
Enter the temperature : 58
The temperature is 14.44 Celsius.
```

```
→ corrections git:(main) ✗ ./temp
What is the unit ? 'C' for Celsius and 'F' for Fahrenheit : c
The temperature is currently in Celsius.
Enter the temperature : 50
The temperature is 122.00 Fahrenheit.
→ corrections git:(main) ✗ ./temp
What is the unit ? 'C' for Celsius and 'F' for Fahrenheit : hello
The temperature unit is wrong.
```
